Norman Virus Control for Workstations

This Norman Virus Control is valid for

Platform	Client: Windows 9x, ME, NT, XP, 2000, Linux (RedHat, SuSE, Debian etc.) and OS/2
Description	With this kind of license, only one single workstation license code is generated, with no distribution tool (i.e. every machine must be installed separately). This contains NVC for Clients but does not contain NVC for Server.

If you want to automate the installation in a corporate environment, use the Corporate Light or Full Edition.

If a company wants to secure 62 workstations for clients not containing server, the company needs a pack 75 (765.00 €) because you **cannot** give a price for an exact number of machines.

You will receive only one key for the company.
